

BOND
TIMBER

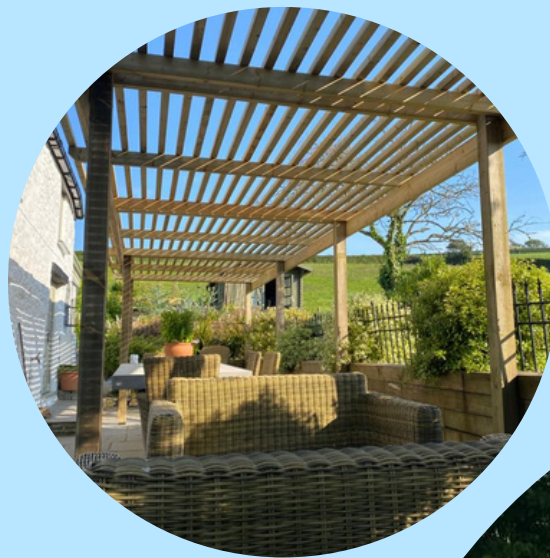

**Summer DIY
Projects**

Pergolas

Local Project

This is a local project we have supplied timber for, and was built by Seth from Tend & Mend.

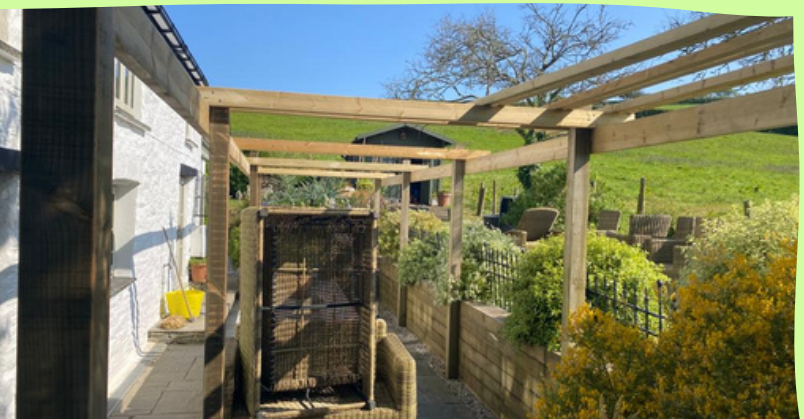

What timber is required?

Tanalised 6 x 2, 8 x 2, and 2 x 2
Planed Gauged Timber has been
used.

The posts are 4 x 4 planed tanalised
and could be produced from either
eased four corners homegrown
timber or joinery unsorted redwood.

All cut ends would need to be treated
with Barrettine Cut End Preservative
also available from our shop. For
fixings Timberlok screws were used.

Ideas & Inspiration

Painted or Stained finishes really enhance the timber. This can be applied on top of Tanalised timber.

Siberian Larch and Western Red Cedar timber are both suitable timbers for this style and available from our online shop or contact us to discuss.
