Before being pressure treated to our Gold Standard (see page 4), the redwood timber posts are surface incised. Mechanical incising allows for a deeper penetration of the Tanalith® E wood preservative into the timber, providing a 30 year service life. Our Gold incised sawn posts are especially suited to agricultural applications.

## Bespoke Machined Posts

At Bond Timber we have the facilities to point weather posts to your desired finish, this could be pointed one, two or four ways. We can also offer chamfered and rounded top posts machined to order. In addition to our treated softwood posts we keep a variety of Sawn Oak posts in stock.

## **Timber Gates**

Our gates are available in a range of designs to suit a variety of urban and rural areas.

To ensure long term performance, the timbers are pressure treated to a 15 year service life. We also keep pedestrian gates and complete ironmongery in stock, visit www.bondtimber.co.uk to view our stocked range.
