# National Highways SS4

For fencing timbers used on motorway and highway projects, the UK Highways Agency insists on a minimum 30 year service life performance protection to meet the National Highways Sector Scheme 4 (NHSS 4) requirements.

As a fencing supplier there is a strict registration and quality approval procedure through the UK Wood Protection Association (WPA) to become an approved fencing supplier to these markets.

We are one of a few companies in the UK that has this approval status. Our ISO 9001 quality status as a business is also part of this approval.

We have supplied timbers to many motorway and highway projects as well as rail industry projects which demand similar quality standards to NHSS 4.
